

USING THE LEAGUE'S ONLINE VOTER REGISTRATION TOOL

A quick guide for voter registration volunteers

The voter completes the form

The voter scans the League QR code and enters the information needed for an Arkansas voter registration application. The tool guides them through the process and creates a completed voter registration form.

1

The League prints the application

Once the voter submits their information, the League prints the registration application so the voter does not need access to a printer or worry about mailing it themselves.

2

The application is submitted to the county clerk

We identify the correct county clerk and mail the completed application for processing. The county clerk makes the official determination that the voter has been registered.

3

We track the application

The League tracks applications after submission and checks for confirmation that the voter has been successfully added to the voter rolls.

4

We help the voter get VOTE READY

Once registration is confirmed, our work isn't over. The League follows up with trusted, nonpartisan information to make sure new voters are ready to cast their ballot with confidence.

5

Sample Script for Voter Registration Events

Scan this QR code and you can fill out your voter registration application right from your phone. The League will print it, submit it to your county clerk, track it to make sure your registration is processed, and follow up with nonpartisan voting information before the next election.
